

Simulation Strategy

Objective of Simulation

The objective of the simulation in the Winnipeg FIR course is to provide opportunities for deliberate practice of skills. A live environment is not always conducive to the learning process as one requires the opportunity to: focus on a skill, make mistakes in a low-stakes setting, receive feedback, reflect, repeat, etc. The simulator is the best setting for this.

Blocking Strategy

Block S1 (G): CYWG Clearance Delivery and Ground

This block is an orientation to Winnipeg Clearance Delivery and Ground
At the end of the block, the student should be ready to issue VFR and IFR clearances and provide taxi instructions at the Winnipeg Airport.

Block S1 (T): Tower

This block is reserved for future tower exercise development.

Block S2: Terminal

This block is reserved for future terminal exercise development.

Block S3: Centre

This block is reserved for future centre exercise development.
